Technical information

Productnumber : 99-172-K

Product description

A new Euronorm 1200x800 mm wooden pallet top-up edge is a standardized pallet format widely used in the logistics sector. This top-up edge (22 mm thick) is specifically designed to add extra height to a standard pallet, making it possible to stack more goods on the pallet without the risk of damage or instability. The add-on edges are designed to stack safely on top of each other. This maximizes storage space and facilitates transportation. TÜV certification indicates that the pallet add-on edge meets the technical standards and quality requirements set by TÜV Rheinland. In addition, the pallet attachment edge is "Heat Treated". Performing this Heat Treatment kills all harmful organisms. Wood that undergoes Heat Treatment meets the ISPM15 requirement. ISPM15 applies to solid wood packaging used to support, protect or transport goods. This makes the attachment edge suitable for international transport. Are you temporarily not using the collars? The hinge system makes it possible to fold the top rim, saving significantly on storage capacity. This is especially beneficial in warehouses, distribution centers or other storage facilities where space optimization is critical. See also below lockable lid, compartments, label holders, attachments, undercarriages for even more possibilities.

Also available as a pallet offer.

Specifications

Article arrangement: New
Version: 6x hingeable
Euronorm (mm): 1200 x 800
Internal length (mm): 1155
Internal width (mm): 755
Weight (kg) 9
Type number: 99-172-K
EAN Code (Gtin) 8719424076950

Type: hingeable construction stackable TÜV
Material: wooden and steel corners
Length (mm): 1200
Width (mm): 800
Height (mm): 200
Options: TÜV certified
Additional specifications: without pallet
