

Technical information

Productnumber : 40-8076

Product description

Plastic drip tray with a capacity of 30 litres. This drip tray is ideal for the workshop due to its height of only 85 mm and length of 980 mm.

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety according to PGS 15 (publication series hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid is collected in a container. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! When a drain tap is mounted on the drip tray, all regulations are canceled. Any form of modification is not allowed.

Specifications

Article arrangement: New

Version: plastic floor part

Floor: oil- and water tight

Colour: black

Width (mm): 600

Volume (ltr): 30

Type number: 40-8076

Type: Retention Basin

Material: polyethylene

Subgroup: Plastic trays

Length (mm): 980

Height (mm): 85

Weight (kg) 4

EAN Code (Gtin) 8719424005929
