

Technical information

Productnumber : 48-8674

Product description

Polyethylene container for two 200 liter drums. The drums can be placed horizontally to create a filling station. The capacity of the collection container is 450 litres. The drum pallet is provided with recesses for pallet forks to be easily moved by a forklift truck or pallet truck.

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety in accordance with PGS 15 (publication series of hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid is collected in a container. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

Specifications

Article arrangement: New
Version: for 2 x 200 l drums
Floor: oil- and water tight
Colour: black
Width (mm): 1380
Volume (ltr): 450
Type number: 48-8674

Type: receptacle for drum
Material: polyethylene
Subgroup: Plastic trays
Length (mm): 1350
Height (mm): 640
Weight (kg) 46
EAN Code (Gtin) 8719424010411
