

Product description

This high-quality PE drip tray can be placed under an IBC. The container has a high resistance to chemicals and a capacity of 1100 litres. The recesses in the bottom make it easy to move the drip tray with a forklift or pallet truck.

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety in accordance with PGS 15 (publication series of hazardous substances):

A storage facility must be such constructed so that leaked or spilled hazardous liquid is collected in a receptacle. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

Specifications

Article arrangement: New Version: with grid floor Floor: oil- and water tight

Colour: black Width (mm): 1170

Loading capacity (kg): 1500

Weight (kg) 53

EAN Code (Gtin) 8719424157383

Type: receptacle for IBC Material: polyethylene Subgroup: Plastic trays Length (mm): 1460 Height (mm): 880 Volume (Itr): 1100 Type number: 48-8581
