## Technical information

**Productnumber : 408W-340**

### Product description

Drip tray with space for eight 200 liter drums. This blue painted drip tray with hot-dip galvanized steel grid has a capacity of 340 liters and is easy to move with a forklift truck or pallet truck. :

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid is collected in a container. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

### Specifications

Article arrangement: Custom built

Version: for 8 x 200 litre drums

Walls: walls closed

Top: 1000kg/m<sup>2</sup>

Colour: blue

Surface treatment: painted

Width (mm): 1300

Volume (ltr): 340

Collection volume (ltr): 340

Additional specifications: StawaR approved (DE)

Type: receptacle for drum

Material: steel

Floor: with galvanized grid

Subgroup: retention basin steel

Ral colour: 5012

Length (mm): 2700

Height (mm): 205

Weight (kg) 194

Type number: 410-395

EAN Code (Gtin) 8719424129465
