

## Technical information

**Productnumber : 412DV**

### Product description

Galvanized steel drip tray suitable for two 200 liter drums. The capacity of this container is 241 liters. The drip tray is made of hot-dip galvanized steel.

Guideline for storage and temporary storage for drip trays with regard to fire safety, occupational safety and environmental safety according to PGS 15 (publication series hazardous substances):

A storage facility must be constructed in such a way that leaked or spilled hazardous liquid is collected in a container. To this end, the collection container must have a capacity of at least 110% of the largest package. However, if 10% of the total content of the packages is more than 110% of the content of the largest package, then the collection capacity must be equal to 10% of the total content of the packages together. The collection container must be sufficiently resistant to the stored liquids.

The collection capacity only applies to liquids. Empty, uncleaned packaging does not count. The collection facility may also be realized in storage. The choice of location for the collection facility may depend on the hazardous liquids stored. Kruizinga.nl is not liable for the type of use!

Please note! Any form of modification is not allowed. If this is the case, all regulations will lapse.

### Specifications

Article arrangement: New  
Version: for 1-2 200 l drums  
Walls: of wire mesh  
Top: 1000kg/m2  
Colour: colorless  
Length (mm): 920  
Height (mm): 1495  
Weight (kg) 152  
Type number: 41D

Type: Retention Basin  
Material: steel  
Floor: with galvanized grid  
Subgroup: retention basin steel  
Surface treatment: galvanized  
Width (mm): 1410  
Application: stacking - not certified to hoist  
Collection volume (ltr): 245  
EAN Code (Gtin) 8719424007770
