## Technical information

**Productnumber : 98-5990GB**

### Product description

Complete used shop rack double sided. Also called gondola theorem, gondola theorem or middle theorem. A gondola rack consists of a partition wall with adjustable shelves on two sides. Specially designed to be placed in the middle of a room and is therefore ideal when you want to make optimal use of the retail space. The rack stands on adjustable feet so that you can always level the rack on uneven surfaces.

Attention! The rack is delivered unassembled. One set consists of:

- 2x uprights 2270 mm high
- 14x closed wall panels
- 6x adjustable shelves
- 8x shelf supports
- 4x adjustable feet
