### Product description

The reusable polypropylene containers with crocodile lid / hinged lid are suitable for manual and automatic handling - in the context of shipping, storage and picking.

Thanks to recessed grips on each side, you can easily carry and handle the boxes.

The Euro containers, measuring 610 x 410 x 349 mm (DxWxH), offer 58 liters of space for the desired products.

With the crocodile lids open, you can conveniently tuck the transport and storage boxes into each other, saving about 75% storage capacity.

The hinged lids simply hang down to the side on the right and left and do not fan out in the process - this means that the containers do not take up any more space as a result either.

Particularly practical: because the crocodile lid is permanently attached, it can never get lost.

To stack the reusable containers, simply close the hinged lids - combined with the containers' sturdy construction, you can stack numerous of the transport and storage boxes on top of each other.

Reusable containers with hinged lids can be sealed for high security requirements or tightly closed with strapping.

Insensitivity to common acids and alkalis.

In short: a very robust and at the same time space-saving storage box for flexible applications.

### Specifications

Article arrangement: New

Version: provided with lid consisting of two parts

Walls: walls closed

Top: with 2-part lid

Euronorm (mm): 600 x 400

Length (mm): 610

Type: distribution bins

Material: polypropylene

Floor: closed

Food-safe: yes

Colour: blue

Internal length (mm): 495
