

Product description

King Kombo. The stepladder that you can also use as a ladder.

The King Kombo is the most multifunctional stepladder of its kind. With this single sided stepladder, flexibility is a certainty and you can place the stepladder in up to three different positions with one hand movement. In the A-position you use this powerhouse in the traditional way, but it is also possible to lean it against a surface. This way, you can get even closer to your work. By folding the rear rack, you can also use your stepladder as a ladder. Very convenient when you need to reach higher heights.

The King Kombo stepladder is available in 5 (+3), 6 (+3) and 8 (+5) treads. In this case, the plus symbol stands for the number of steps by which the stepladder can be extended when placed in ladder position. The stepladder is equipped with an integrated support with anti-slip material, so that you can place the stepladder against a wall, in an outer corner or against a round, square or rectangular pole. With a tread depth of 8 cm, the large contact surface ensures that you always stand securely and stable.

Multifunctional and flexible

You can place the stepladder in the A-position, in the lean-to position, or in the ladder position. This means that you only need one tool at height for all tasks. Space-saving and effective!

With integrated support for easy placement

Place your stepladder easily against any surface with the integrated support. The anti-slip material of the support allows you to place your stepladder safely and without concern against walls, corners or against a pole.

Narrow rear rack for the smallest openings

The rear rack is narrow, allowing you to position the stepladder in and through small openings. This also makes it easy to place the stepladder in ceiling shutters.

Specifications

Article arrangement: New

Version: 6+3 steps

Subgroup: Stairs

Height (mm): 2000

Weight (kg) 22

Type: Altrex folding ladder

Material: aluminium

Colour: alu silver

Loading capacity (kg): 150

Options: Norm: EN 131
