Product description

An 84-liter used warehouse bin made of painted steel is a rugged storage container widely used in warehouses, workshops and industrial environments. The painted steel construction makes the bin durable and resistant to wear and tear, making it suitable for harsh conditions. Designed with sturdy stacking edges, allowing for easy and safe stacking. This allows efficient use of available space, keeping the warehouse organized and uncluttered. The closed walls provide full protection to the contents of the bin. This is especially useful for storing smaller parts or goods that need extra protection from dust, dirt, or other environmental influences. The two handles on the short sides facilitate handling and moving the storage bins. This contributes to efficient logistics and transportation of goods within the warehouse or between different locations. Suitable for industries such as logistics, manufacturing, and distribution, where streamlined storage is essential for efficient operations.

Specifications

Article arrangement: Used

Version: falling grips at the short sides

Walls: walls closed

Colour: yellow

Length (mm): 660

Width (mm): 480

Height (mm): 290

Volume (ltr): 84

Type number: 6182GB

Type: stackable

Material: steel

Floor: closed

Surface treatment: painted and use damage

Internal length (mm): 630

Internal width (mm): 450

Internal height (mm): 280

Weight (kg) 11
